Dhruv Boghani

Full-Stack Developer | Backend-Focused

Email: dhruvboghani624@gmail.com | Phone: (+91) 9408564882 | Location: Surat, Gujarat, India
LinkedIn: linkedin.com/in/dhruv-boghani | GitHub: github.com/Dhruv-Boghani

PROFESSIONAL PROFILE

Full-Stack Developer with hands-on practice in **scalable backend systems**, live web apps, and modern **AI integration**. Experienced in architecting robust systems like the **Kanishka Fashion E-Commerce ecosystem** and a comprehensive **School ERP**. Proven ability to build **fast Python APIs** for AI-powered solutions, including railway inspection systems and multilingual agriculture assistants. Skilled in **database design**, automated **CI/CD pipelines**, and leveraging tools like **Hugging Face, LangChain, and vector databases** to solve complex, real-world problems.

TECHNICAL SKILLS

Backend Development: Node.js, Express.js, FastAPI, REST APIs, Backend Architecture, Automation Scripts
Frontend: HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), React, EJS, Next.js, React Native
Databases: PostgreSQL (Neon), MongoDB, SQL, Pinecone Vector DB, Redis
AI & ML Tools: LangChain, LangGraph, Hugging Face, PyTorch (Basic), YOLO, Computer Vision, RAG Systems
DevOps & Tools: Git, GitHub, Docker, CI/CD Pipelines, Cron Jobs, API Security, Vercel, Postman

KEY PROJECTS

Kanishka Fashion E-Commerce Platform | Admin Panel | Mobile App *React Native, React, Node.js, Neon PostgreSQL, Redis, Pinecone, RAG, Razorpay*

- Developed an **industry-ready e-commerce ecosystem** featuring a React admin dashboard and a React Native mobile app (iOS/Android), with a backend handling **10k+ concurrent users**.
- Built **Redis-powered real-time analytics** (live user counts, 30-day sales graphs, product views) and strict concurrency control to prevent stock race conditions.
- Integrated an advanced **coupon system** with flat/percentage discounts and targeted user limits, plus **Google OAuth** and **Razorpay** for secure payments.
- Built a dedicated **RAG service server using Pinecone Vector DB**, synced with a **Neon PostgreSQL** database, to power AI-driven personalized product search.

Railway Wagon Inspection System | Live Link *FastAPI, React, Python, WebSocket, Tailwind CSS*

- Built a **full-stack AI inspection dashboard** in a 5-member team during Adani Hack Innovate 2026; users upload multi-angle train footage (left, right, top) for automated defect analysis.
- Generated detailed reports showing **wagon and door counts**, flagged individual wagons with defects, and calculated a **risk percentage** per inspection.
- Engineered **real-time WebSocket updates** between backend AI models and the React frontend, plus a documentation page with a system overview video.

Autonomous CI/CD Pipeline | Live Link *LangGraph, Python, FastAPI, Docker*

- Created an **automated deployment tool** for senior developers in a 4-member team during the RIFT Hackathon, triggered via a repository link and Vercel/GitHub tokens.
- Powered by a **LangGraph RAG system** that autonomously clones repositories, creates or verifies a Dockerfile, runs the project in **Docker**, and scans code for errors.

- Automatically pushed **bug-fixed code** to a new branch, eliminating manual debugging and deployment steps.

School ERP System | Student Panel | Admin Panel *Node.js, Express.js, PostgreSQL, REST APIs*

- Developed a full **School ERP system** with a backend built using **Express.js and PostgreSQL**, deployed as separate student and admin frontend apps.
- Built **REST APIs** for student details, admin controls, secure login, and fee management.

Krishi Sakhi – AI Farming Assistant *AI Innovation Challenge* | *AI/ML, NLP*

- Designed an **AI-powered personal farming assistant** delivering personalized agricultural advice, activity tracking, and proactive guidance, supporting **20+ local languages** for smallholder farmers.

HONORS & HACKATHONS

Finalist (Top 10) - AI Innovation Challenge Gujarat (2026) *CSRBOX & IBM SkillsBuild*

- **Secured 9th Position** among 50+ teams in a state-level hackathon by developing an innovative AI solution.

National Hackathon Participant

- **Hack Innovate 2026 (Adani Institute):** Competed in solving real-world industrial problems to build a railway wagon inspection system.
- **RIFT Hackathon (PW Vidyapeeth):** Participated in a synchronized multi-city coding challenge to build an autonomous CI/CD tool.

EDUCATION

Bachelor of Engineering in Information Technology *Expected 2027*
Shantilal Shah Engineering College, Bhavnagar, India
Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Web Technology.

Higher Secondary Education (HSC) *2023*
Shri K. C. Kothari High School, Surat | *Percentage: 73% (92 PR)*
